

# Land surveyors Engineering School

Long Internship

In the 2nd year engineering cycle, students must complete a 16-week long placement.

Start of the internship: September 2, 2024

End of the internship: at the latest December 31, 2024

It's an internship at assistant engineer level with work experience

During this internship, students apply their acquired skills and will develop new knowledge and skills:

- Manage geographical information
- Understand territories and act on their development at different scales
- Carry out an operation to acquire and process georeferenced data
- Carry out modelling of a project or of the existing situation
- Conduct a land management or land expertise

Students have to solve a problem

# Role of the mentor

- Facilitates the integration of the student into the organisation
- Decides on the guidelines of the work, in accordance with the needs of the company, and in respect of the subject agreed by the school
- Guides the student in the production of the internship report (dissertation, summary)
- Supervises, trains and follows the student during the internship

# The subject matter

The proposed subject must clearly show a mission to be accomplished with objectives to be reached which must call on the specific skills engineer of the ESGT
